

Villa St Tropez

Ramatuelle, St Tropez, France

What we love...

We love the striking modernist structure that blurs the lines between inside and out, making Villa St. Tropez an alfresco architectural delight.

Villa St. Tropez combines contemporary styling and unbeatable comfort in the most imaginative of ways, creating a space that blurs the lines between interior and exterior space yet is firmly defined on one thing: luxury.

Sleeping 16 in eight bedrooms, four of which are king-size en suites and four queen en suites, Villa St. Tropez is a masterpiece of architecture.

Making the most of the warm Mediterranean climate, life in Villa St. Tropez is one long alfresco lunch. With the living and dining room areas home to huge panoramic windows and spilling on to the covered terrace, which flows into the spectacular 15m vanishing edge swimming pool, you'll always be bathed in sunlight and fresh air.

And Villa St. Tropez cries out to be entertained in – whether it be cocktails by the pool, dinner for 18 or lunch on the terrace, your guests won't know what to exclaim over first.

Recovering from the entertaining will be easy. From the moment you wake up in your comfy bed, enjoy a coffee while you soak up the sumptuous views of the rolling Provençal countryside from each bedroom's vast floor-to-ceiling windows. Take a soak in your spa-inspired marble en suite and the scene continues – many of the bathrooms' tubs come with a view to swoon for.

If you can tear yourself away from this lap of luxury, Escalet beach is just a five minute drive away.
